INDEX TO VOLUME 69 (PART A) 1991

AUTHORS AND PAPERS

A

Acharya, D.R. (see Li, K.) 35
Afacan, A. (see Nasr-El-Din, H.A.) 374
Allen, S.J. (see Carolan, C.A.) 195
Aris, R., Manners makyth modellers 165
Augustyniak, J.D. (see Lockett, M.J.) 99

B

Bahu, R.E. (see Langrish, T.A.G.) 417
Baird, M.H.I. (see Shen, Z.J.) 143
Barnes, L.J., Janssen, F.J., Sherren, J., Versteegh, J.H., Koch, R.O. and Scheeren, P.J.H., A new process for the microbial removal of sulphate and heavy metals from contaminated waters extracted by a geohydrological control system 184
Battrum, M.J. and Thomas, W.J., Carbon monoxide recovery by pressure swing adsorption 119
Bekassy-Molnar, E. and Mustafa, H., Clear liquid heights in the froth, mixed and spray regimes 14
Best, R. and Hernandez, J., Experimental studies on the operating characteristics of an ammonia-water absorption system for solar cooling 153
Biddlestone, A.J. (see Job, G.D.) 187
Blair, H.S. (see Carolan, C.A.) 195
Boger, D.V. (see Leong, Y.K.) 381
Bongenaar-Schlenter, B.E. and van Raam, L., Electrosynthesis of epichlorohydrin from allyl chloride 71
Bowen, J.H. (see Mutasim, Z.Z.) 108
Boyes, A.P., Lu, X.X., Raymahasay, S., Saremento, S., Tilston, M.W. and Winterbottom, J.M., The cocurrent downflow contactor (C.R.C.): mass transfer and reaction characteristics in unpacked and packed-bed operation 200
Brucato, A., Magelli, F., Nocentini, M. and Rizzuti, L., An application of the network-of-zones model to solids suspension in multiple impeller mixers 43
Bulters, M.J.H. (see Meijer, H.E.H.) 190

C

Carolan, C.A., Blair, H.S., Allen, S.J. and McKay, G., N, O-carboxymethyl chitosan, a water soluble derivative and potential 'green' food preservative 195
Carroll, J.J. and Mather, A.E., Estimating the effect of an impurity on the LLV locus of hydrogen sulphide-water 425
Chase, H.A. (see Halden, K.) 181
Che, D.F., Chen, J.J.J. and Taylor, M.P., Gas bubble formation and rise velocity beneath a downward facing inclined surface submerged in a liquid 25
Chen, J.J.J. (see Che, D.F.) 25
Clement, K.H., Hallstrom, A., Dich, H.C., Le, C.M., Mortensen, J. and Thomsen, H.A., On the dynamic behaviour of spray dryers 245
Crittenden, B.D. (see Sowerby, B.) 3

D

Davies, C.E. and Foye, J., Flow of granular material through vertical slots 369
de Jong, J. (see Jager, J.) 53
Delaby, O. (see Smith, R.) 492
De Ridder, L.A. Revised dynamic similarity criteria for flow systems 161
Deshun, F., Wakeman, R.J. and Huang, Z., An analysis of gyratory forces and wobble angles in tumbler centrifuges 409
Deshun, F. (see Wakeman, R.J.) 403
Deter, M. and Gerrard, A.M., On finding the most cost efficient strategy for the separation of multicomponent mixtures using a single distillation column 480
de Wolf, S. (see Jager, J.) 53
Dich, H.C. (see Clement, K.H.) 245
Doory, L.D., Said, B.E., Ullah, U. and Waldram, S.P., Automobile exhaust gas treatment in an active transport catalytic reactor 203
Douglas, P.L., Mallick, S.K. and Wagler, R.M., Synthesis of flexible thermally integrated distillation sequences 483
Dudley, J.W.O. (see Field, R.W.) 237
Dugwell, D.R. (see Khraisha, Y.H.) 76

F

Field, R.W., Dudley, J.W.O. and Greaves, M., Factorial analysis of *in situ* combustion experiments 237
Foye, J. (see Davies, C.E.) 369

G

Gerrard, A.M. (see Deter, M.) 480
Godfrey, J.C. and Slater, M.J., Slip velocity relationships for liquid- liquid extraction columns 130
Gray, K.R. (see Job, G.D.) 187
Greaves, M. (see Field, R.W.) 237
Guedes de Carvalho, J.R.F., Pinto, A.M.F.R. and Pinho, C.M.C.T., Mass transfer around carbon particles burning in fluidised beds 63
Gupta, S.K. (see Sarkar, M.) 361

H

Halden, K. and Chase, H.A., Methanotrophs for renovation of polluted aquifers 181
Hallstrom, A. (see Clement, K.H.) 245
Hernandez, J. (see Best, R.) 153
Hewitt, G.F., Chemical engineering in the British Isles: The academic sector 79
Huang, Z. (see Deshun, F.) 409
Hughes, R. (see Li, K.) 35

J

Jager, J., de Wolf, S., Kramer, J.M. and de Jong, J., Estimation of nucleation and attrition kinetics from CSD-transients in a continuous crystallizer 53
Jamialahmadi, M. and Muller-Steinhagen, H., Effect of liquid additives on pool boiling heat transfer to water 221
Janssen, F.J. (see Barnes, L.J.) 184
Jarvis, R.B. and Pantelides, C.C., Robust dynamic simulation of chemical engineering processes 213
Jenkins, J.D. (see Porter, K.E.) 229
Job, G.D., Biddlestone, A.J. and Gray, K.R., Treatment of high strength agricultural and industrial effluents using reed bed treatment systems 187

K

Kemp, I.C., Some aspects of the practical design of pinch technology methods 471
Kenney, C.N. (see Liow Jong-Leng) 215
Khraisha, Y.H. and Dugwell, D.R., Effect of water vapour on the calcination of limestone and raw meal in a suspension reactor 76
Kippax, J.W. and Swift, J.D., The interactions between thermodynamic property measurement, use and development of multicomponent distillation column design, 211
Koch, R.O. (see Barnes, L.J.) 184
Kramer, J.M. (see Jager, J.) 53
Kwauk, M. (see Li, H.) 355

L

Labayru, R. and White, D.A., Transport of cations across inorganic membranes by electrodialysis in an electric cell 30
Langrish, T.A.G., Bahu, R.E. and Reay, D., Drying kinetics of particles from thin layer drying experiments 417
Le, C.M. (see Clement, K.H.) 245
Leong, Y.K., Boger, D.V. and Parris, D., Surface and rheological properties of zirconia suspensions 381
Li, H. and Kwauk, M., Hydrodynamics of the v-valve 355
Li K., Acharya, D.R. and Hughes, R., Simulation of gas separation in an internally staged permeator 35
Liow Jong-Leng, Kenney, C.N., The simple cycle of the pressure swing adsorption process, 215
Lockett, M.J. and Augustyniak, J.D., On tilted trays 99

TITLES AND KEYWORDS FOR PAPERS

A
absorption 153
adsorption 3, 108
adsorption isotherm 108
aerated bed 361
agricultural effluents 187
air separation 215
algorithm 435
allyl chloride 71
ammonia-water 153
ammonium sulphate 53
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows, Meijer, H.E.H. and Bulters, M.J.H. 190
Analysis of gyratory forces and wobble angles in tumbler centrifuges, An, Deshun, F., Wakeman, R.J. and Huang, Z. 409
anion adsorption 381
Application of the network-of-zones model to solids suspension in multiple impeller mixers, An, Brucato, A., Magelli, F., Nocentini, M. and Rizzuti, L. 43
aquifier renovation 181
Automobile exhaust gas treatment in an active transport catalytic reactor, Doory, L.D., Said, B.E., Ullah, U. and Waldram, S.P. 203

B
baffled channels 208
baffled tubes 197
baffles 506
batch dryer 417
bubbles 25, 221

C
CAD 435
calcination 76
carbon 63
Carbon monoxide recovery by pressure swing adsorption, Battrum, M.J. and Thomas, W.J. 119

car exhaust gas 203
catalysis 203
C.D.C. 200
cement 76
centrifugation 403, 409
chaotic advection 208
characteristic curve 417
Chemical engineering in the British Isles: The academic sector, Hewitt, G.F. 79
classification 398
clear liquid height 14
Clear liquid height on sieve plates in the froth, mixed and spray regimes, Bekassy-Molnar, E. and Mustafa, H. 14
CO_2 enrichment 119
Cocurrent downflow contactor (C.D.C.): mass transfer and reaction characteristics in unpacked and packed-bed operation, The, Boyes, A.P., Lu, X.X., Raymahasay, S., Saremento, S., Tilston, M.W. and Winterbottom, J.M. 200
cogeneration 492
combined heat and power 492
combustion 63
compact heat exchangers 435
computer simulation 245
Control ring centrifuge—a new type of conical basket centrifuge, The, Wakeman, R.J. and Deshun, F. 403
cooling 153
CO recovery 119
costs 480
crossflow filtration 386
crystal attrition 53
crystal birth 53
crystal size distribution 53
CSD-dynamics 53

D
DAEs 213
delta paddle impeller 143
Delta paddle mixing impeller—some hydrodynamic studies, The, Shen, Z.J. and Baird, M.H.I. 143
design 229, 403, 409, 435, 445, 458
Designing a solvent for gas absorption, Porter, K.E., Sitthiosoth, S. and Jenkins, J.D. 229
dichlorohydrin 71
dilute suspensions 193
dipleg 355
distillation 99
distillation sequences 483
downcomer 355
dryers 471
drying kinetics 417
Drying kinetics of particles from thin layer drying experiments, Langrish, T.A.G., Bahu, R.E. and Reay, D. 417
dynamic properties 245
dynamic similarity 161

E
Effective diffusivity and tortuosity in Wicke-Kallenbach experiments using stochastic pore networks, Patwardhan, A.V. and Mann, R. 205
Effect of liquid additives in pool boiling heat transfer to water, Jamialahmadi, M. and Muller-Steinhagen, H. 221
Effect of water vapour on the calcination of limestone and raw meal in a suspension reactor, Khraisha, Y.H. and Dugwell, D.R. 76
efficiency 99
electrochemical reactor 71
electrodialysis 30
electrofiltration 386
electro osmosis 30
electrosynthesis 71
Electrosynthesis of epichlorohydrin from allyl chloride, Bongenaar-Schlenter, B.E. and van Raam, L. 71
elutriation 398
Elutriation of solids from a binary mixture, Smith, T.N. 398
emissions 492
epichlorohydrin 71
equilibrium streamline 193
Estimating the effect of an impurity on the LLV locus of hydrogen sulphide- water, Carroll, J.J. and Mather, A.E. 425
Estimation of nucleation and attrition kinetics from CSD-transients in a continuous crystallizer, Jager, J., de Wolf, S., Kramer, J.M. and de Jong, J. 53
ethanol-water azeotrope 3
Experimental investigation of solids flow from aerated beds through inclined pipes, Sarkar, M., Gupta, S.K. and Sarkar, M.K. 361
Experimental studies on the operating characteristics of an ammonia-water absorption system for solar cooling, Best, R. and Hernandez, J. 153
Experimental study of electroacoustic crossflow microfiltration, An, Wakeman, R.J. and Tarleton, E.S. 386

F
factorial analysis 237
Factorial analysis of *in situ* combustion experiments, Field, R.W., Dudley, J.W.O. and Greaves, M. 237
falling film generator 153
filtration 386, 403, 409
flexibility analysis 483
flexible 458, 465
Flexible pinch design method for heat exchanger networks. Part I Heuristic guidelines for free hand designs, The, Suaysompol, K. and Wood, R.M. 458
Flexible pinch design method for heat exchanger networks. Part II FLEXNET—heuristic searching guided by the A* algorithm, The, Suaysompol, K. and Wood, R.M. 465
flow 361
Flow of granular material through vertical slots, Davies, C.E. and Foye, J. 369
flow measurement 369
flow in mixer 143
flowrate 369
flue gas 492
fluidisation 398
fluidised beds 63, 361
fluid mechanics 506
fluid mixing 197, 208
fluid oscillation 197
fluid systems 161
food preservatives 195

G
gas absorption 229
Gas bubble formation and rise velocity beneath a downward facing inclined surface submerged in a liquid, Che, D.F., Chen, J.J.J. and Taylor, M.P. 25
gas-liquid flow 25
gas-particle flow 355
gas separation 35, 119
geohydrological control systems 184
Girdler-sulphide process 425

H
heat exchanger network 445
heat exchangers 435, 458, 465
heat transfer 21, 221
Heat transfer to a particle in a thermal plasma, Wu, M.K., McFeaters, J.S., Welch, B.J. and Stephens, R.L. 21
heuristics 458, 465, 480
high strength effluents 187
hold-up 130
homologous systems 161
hydrodynamics 14, 130, 355
Hydrodynamics of the V-valve, Li, H. and Kwauk, M. 355

I
inclined pipe 361
inclined surface 25
industrial effluents 187
inorganic membranes 30
in situ combustion 237
Interactions between thermodynamic property measurement, use and development of multicomponent distillation column design, The, Kippax, J.W. and Swift, J.D. 211

Interfacing heat exchanger network synthesis and detailed heat exchanger design, Polley, G.T. and Panjeh-Shahi, M.H. 445
internally staged 35

L
laminar flow 161
Langmuir isotherm 108
Lateral migration: a simple continuous separation mechanism for dilute suspensions, Purdom, G.J. and Richardson, S.M. 193
levelness 99
limestone 76
liquid additives 221
liquid-liquid extraction 130
liquid-liquid-vapour equilibria 425

M
Manners makyth modellers, Aris, R. 165
mass transfer 63, 215, 221
Mass transfer around carbon particles burning in fluidised beds, Guedes de Carvalho, J.R.F., Pinto, A.M.F.R. and Pinho, C.M.C.T. 63
mathematical model 215, 245
mathematical modelling 165
membranes 35
methane mono-oxygenase 181
Methanotrophs for renovation of polluted aquifiers, Halden, K and Chase, H.A. 181
microbial treatment process 184
microfiltration 386
mixing 43, 143, 506
mixtures 221
modelling 3, 43, 165
monoclinic ZrO_2 381
moving-bed 355
multicomponent distillation 480
multicomponent distillation columns 211
multiple impeller 43

N
N, O-carboxymethyl chilosan, a water soluble derivative and potential 'green' food preservative, Carolan, C.A., Blair, H.S., Allen, S.J. and McKay, G. 195
Navier-Stokes equations 161
network-of-zones 43
networks 458, 465
New process for the microbial removal of sulphate and heavy metals from contaminated waters extracted by a geohydrological control system, A, Barnes, L.J., Janssen, F.J., Sherren, J., Versteegh, J.H., Koch, R.O. and Scheeren, P.J.H. 184
non-laminar flow 161
nucleate boiling 221

O
oil recovery 237
On the dynamic behaviour of spray dryers, Clement, K.H., Hallstrom, A., Dich, H.C., Le, C.M., Mortensen, J. and Thomsen, H.A. 245
On finding the most cost efficient strategy for the separation of multicomponent mixtures using a single distillation column, Deter, M. and Gerrard, A.M. 480
optimisation 445, 483
orifice 25
orifice-flow 369
oscillatory flow 208, 506
Oscillatory flow within tubes containing wall or central baffles, Mackay, M.E., Mackley, M.R. and Wang, Y. 506
oxygen concentration 215

P
packings 200
parameter estimation 53
Particle collection from vertical slurry flow through a small side port, Nasr-El-Din, H.A., Afacan, A. and Masliyah, J.H. 374
particle heating and vaporisation 21
particles 403, 409, 417
permeator 35
physical 229
pinch 458, 465
pinch technology 471
plasma processing 21
polluted aquifiers 181
pores 205
pressure drop 445
pressure swing adsorption 215
Pressure swing adsorption in non-isothermal, non-equilibrium conditions—single adsorbate, Mutasim, Z.Z. and Bowen, J.H. 108
process design 483
Process innovation using oscillatory flow within baffled tubes, Mackley, M.R. 197
process integration 471
process synthesis 483
PSA 119
pullout 190

R
Rapid design algorithms for shell-and-tube and compact heat exchangers, Polley, G.T., Panjeh-Shahi, M.H. and Picon Nunez, M. 435
reactor 71
reed bed systems 187
refrigeration 153
Revised dynamic similarity criteria for flow systems, De Ridder, L.A. 161
rheology 381
rise velocity 25
Robust dynamic simulation of chemical engineering processes, Jarvis, R.B. and Pantelides, C.C. 213

S
searching 465
selective permeability 195
separation 108, 386, 403, 409
shell-and-tube heat exchangers 435
sieve plate 14
Simple cycle of the pressure swing adsorption process, The, Liow Jong-Leng, and Kenney, C.N. 215
Simulation of chaotic advection for application to process engineering, The, Roberts, E.P.L. 208
Simulation of gas separation in an internally staged permeator, Li, K., Acharya, D.R. and Hughes, R. 35
single adsorbate 108
slip velocity 130
Slip velocity relationships for liquid-liquid extraction columns, Godfrey, J.C. and Slater, M.J. 130
slot-meter 369
slurry reactors 200
solar cooling 153
solid 361
solids concentration 374
solids-flow 369
solids segregation 374
solids suspension 43
solvent 229
Some aspects of the practical design of pinch technology methods, Kemp, I.C. 471
spinning 190
spray drying 245
SRB 184
startup 471
steady flow 208
stochastic pore networks 205
stream data extraction 471
Surface and rheological properties of zirconia suspensions, Leong, Y.K., Boger, D.V. and Parris, D. 381
suspension 381
Synthesis of flexible thermally integrated distillation sequences, Douglas, P.L., Mallick, S.K. and Wagler, R.M. 483

T
targeting 471, 492
Targeting flue gas emissions, Smith, R.M. and Delaby, O. 492
thermal integration 483
thermal plasma 21
tilt 99

Tilted trays, On, Lockett, M.J. and Augustyniak, J.D. 99
tortuosity 205
trajectory 213
Transport of cations across inorganic membranes by electrodialysis in an electric cell, Labayru, R. and White, D.A. 30
trays 99
Treatment of high strength agricultural and industrial effluents using reed bed treatment systems, Job, G.D., Biddlestone, A.J. and Gray, K.R. 187
two-film linear rate expression 3

U
ultrasonics 386
UNIFAC 229
utilities 492

V
Vapour phase adsorption and desorption model for drying the ethanol-water azeotrope in small columns, A, Sowerby, B. and Crittenden, B.D. 3
vertical 369
vertical slurry flow 374
vortex shedding 143
vortex size predicton 190
V-valve 355

W
wall sampling 374
water 221
Wicke-Kallenbach configuration 205

Y
yield stress 381

REGULAR FEATURES

Contents of the Canadian Journal of Chemical Engineering 96, 176, 256, 351, 432, 518
Doctorates in Chemical Engineering 1989–90 91
List of Referees 1991 519

BOOKS REVIEWED

Boilers, evaporators and condensers. S. Kakac (John Wiley and Sons). Reviewed by R. A. Smith 514
Chemical reactions of natural and synthetic polymers. M. Lazar, T. Bleha and J. Rychly (Ellis Horwood Limited). Reviewed by A. F. Johnson 254
Drops and bubbles—AIP conference proceedings 197. Taylor C. Wang (ed) (American Institute of Physics). Reviewed by B. J. Azzopardi 347
Energy and Empire—a biographical study of Lord Kelvin. Crosbie Smith and M. Norton Wise (Cambridge University Press). Reviewed by J. C. R. Turner 94
Foundations of computer aided process design. J. J. Sirola, I. E. Grossman and G. Stephanopoulos (eds) (Elsevier Science Publishers). Reviewed by F. A. Perris 255
Fuel science and technology handbook. James G. Speight (ed) (Marcel Dekker Inc). Reviewed by A. Williams 429
Gas fluidization: handbook of powder technology. M. Pell (Elsevier Science Publishers). Reviewed by M. J. Rhodes 347
Large scale systems control and decision making. H. Tamura and T. Yoshikawa (eds) (Marcel Dekker Inc). Reviewed by Madan Singh 94
Particle size measurement, 4th edition. Terence Allen (Chapman and Hall). Reviewed by N. Stanley-Wood 514
Pore size engineering in zeolites. E. F. Vansant (John Wiley and Sons). Reviewed by R. Mann 429
Principles of polymer engineering rheology. James Lindsay White (Wiley Interscience). Reviewed by H. Benkreira 254
Transport processes in chemically reacting flow systems. Daniel E. Rosher (Butterworths). Reviewed by C. McGreavy 348
